(54) **A transmission document edition device, a received document processing device, a server device in a communication document processing system, and a computer-readable record medium that stores the function**

(57) A transmission document edition device edits a transmission document to be transmitted to a variety of mobile communication terminals from a document described in a markup language. A document content temporarily storage unit stores a document including a plurality of document elements to be transmitted. A device input/output information storage unit stores a plurality of pieces of device input/output information that indicate the document elements to be transmitted for a plurality

of types of mobile communication terminal. A transmission document creation unit creates a transmission document including the document and the plurality of pieces of device input/output information. A simulation operation execution unit obtains the piece of device input/output information corresponding to the designated type of mobile communication terminal from the transmission document, selects the document element indicated in the obtained device input/output information, and creates display data.
